

**OPTIONAL STAND  
NOW AVAILABLE!**  
With all 3, 4 and 6 bag models.

## CARBERY SOLID FUEL STORAGE BUNKERS

Let's face it, nothing compares to snuggling up in front of a real fire, during the long, cold Winter nights. That's why Carbery offers storage bunkers, purpose designed for the storage of all types of solid fuel, including coal, briquettes, logs, peat, slack and wooden blocks.

Carbery bunkers are manufactured from corrosion resistant materials and unlike steel alternatives, will never rot, rust or corrode. Lightweight and easily handled, for ease of filling and emptying, every Carbery bunker benefits from large entry and outlet doors. An optional stand can even be supplied with 3, 4 and 6 bag models, allowing you to dispense stored fuel directly into a bucket or scuttle.

## Much more than just a Coal Bunker!

**Built stronger, to last longer... Carbery Bunkers have been used to store all kinds of solid fuel for over 3 decades.** But as well as being ideal for solid fuel, Carbery Bunkers can also make great, general purpose storage containers, at home, on the farm and in stores and workshops too! Upon request, each model in the range can also be supplied without a bottom discharge door, for the storage of feed, solid fuel, granules, salt, sand and grit.
